

PictureTally[®] Line Scan System

River City Software

Product Description

PictureTally[®] Line Scan systems display high-resolution pictures of lumber on production lines. See ALL the details of every piece of lumber without having to manually or mechanically touch or flip the board.

High-Resolution display of both the top and bottom of the board.

Product Specifications

Operating Temp: -20°F to 120°F
 Power Requirements: 24 V DC or 120 V 60 Hz AC
 Computer: Industrial, WindowsXP
 Accuracy: Measures to 1/10" from 2" to 36"
 System enclosures: NEMA
 Cleaning: Automatic Laminar air flow

Benefits

- High-resolution, real-time color pictures
- See both top and bottom of boards
- Dimensional information of each piece
- In-line with a head-rig, re-saw, planer line
- Instantaneous viewing at high speeds
- Remote viewing where you need to see it
- No mechanical board flipping required
- See every detail of every board

Detailed view for grader assistance.

Industrial enclosures

Built to Last

The PictureTally[®] Line Scan system is engineered to withstand the harsh demands of sawmill and lumber manufacturing environments, providing trouble-free operation day in and day out.

State of the Art

- Long-lasting, high powered LED lighting
- NEMA 12 rated industrial enclosures
- Optional air-flow automatic cleaning
- Mega-Pixel industrial cameras
- Customized workflow for your production lines

Processing lumber is about maximizing speed, efficiency, quality and your profit. PictureTally[®] Line Scan systems show you the details of every board moving down your production lines in real-time without touching a single board.
